NAME

eplain – expanded plain TeX

SYNOPSIS

eplain [first-line]

DESCRIPTION

eplain is an extension of plain T_EX originally described in the book *T_EX for troff for the Impatient*. It adds these features (among others) to plain T_EX:

- left-justified displays

- double-column output

- tables of contents

- *\hrule* and *\vrule* with a different default than 0.4pt

- time of day

- verbatim file listing

- generalized footnotes

- blank and black boxes

- citations using BIBT_EX

FILES

eplain/doc/eplain.texi

T_EXable documentation of **etex** macros in **texinfo** format.

eplain.info*

Online GNU Emacs **info**(1) files produced from *eplain.texi*.
