

Glossaries Language Module: glossaries-spanish

Nicola Talbot

version 1.0 (2014-11-23)

This language module simply needs to be installed. The glossaries package will automatically load it if required.

1 The Code

1.1 glossaries-spanish-noenc.ldb

```
1 \@ifpackageloaded{polyglossia}%  
2 {%
```

This is unlikely to occur, since if polyglossia has been loaded then the glossaries-spanish-utf8.ldb file should've been loaded instead.
